Work Experience

Front-end Developer, 2022 - Present

The Bulb Africa

- Converting Mock-ups to actual code with Material UI, Styled Components, Tailwind CSS, Fetching, consuming APIs, and DOM manipulation with React/Redux .
- Worked with various teams to create and maintain digital experiences for multiple company products.

Front-end Developer, 2021

Freelance

My Personal Portfolio

- I built my Personal portfolio using React, Tailwind CSS, Material UI, React icons and AOS animations.
- It is a one-page website that has a dark theme and is user-friendly, seamless, and responsive on any given device.

REST Country API with color theme switcher

- I built a REST country API using React, Styled-component, Material UI, and React icons.
- I implemented the use of React-Router as a means of navigation, used Redux to manage states, and fetched the country data using Axios.
- I added a light and dark theme toggle switch.

Advice Generator App

<https://chilara.github.io/advice-gen-app/>

- I created an Advice Generator App using HTML, CSS, JavaScript, and Advice slip API.
- I implemented data fetching from Advice slip API.

BMI App

<https://chilara.github.io/BMI-calculator/>

- I built a BMI app (Body Mass Index) using HTML, CSS, and JavaScript. This product was built for the health-tech/Fitness sector.
- It is a way of estimating the amount of body fat. The basic functionality is calculating the risk of heart disease and checking if an individual has a healthy body weight.
- I made it user-friendly, seamless, and responsive on any given device.
